DAILY PITTSBURGH GAZETTE.

SATURDAY AFTERNOON, DEC. 28, 1833.

INTERNAL IMPROVEMENT.—We publish, to day, an extract from the Philadelphia Commercial Herald, which seems to be more especially the organ of the Board of Trade, of that city, from which it appears that there is much reason to apprehend that our entire system of Internal Improvement is in imminent danger. It seems manifest that unless something is speedily done to remove the embarrassment and distress which now exists in the money market, to the eastward, funds will not be obtained to complete the great plan which has been devised for giving to Pennsylvania the noblest and most commanding scheme of internal improvements that has ever been devised. Pennsylvania, which had in prospect, and almost within her reach, the entire transportation of the immense trade of the great west, seems doomed to have these bright anticipations dissipated at one fell blow. New York, which, a few days ago, seemed to be in despair, and to have abandoned all hope of being able to compete with the superior advantages of her southern neighbor, must now feel elated with the assurance that the crowning effort in the great scheme of Pennsylvania improvements—the cross cut canal—will at least be deferred for many years, if not entirely defeated.

We observe that the New York delegation is almost unanimous in opposition to the renewal of the charter, and in support of the removal of the deposits.—This is not surprising, when we look at the probable influence of those measures. If the Pennsylvania United States Bank is broken down and Pennsylvania improvements arrested, N. York may well rejoice, and may well support measures which will result so happily for her interests.—Will Pennsylvania give her countenance to measures of such evil tendency? If she does, the title "stupid" should be added to that of "humble Pennsylvania."

Extract of a letter, dated

"WASHINGTON, Dec. 23, 1833.

"I communicated to Mr. Gales information of the irregularity attending the transmission of the National Intelligencer. There is something wrong about the mails—yesterday, I received four daily Pittsburgh Gazettes, and to day, two Advocates.

"Mr. M'Duffie closed his argument to day—he did not spare Mr. Taney—he accused him of intentionally suppressing the truth. M'Duffie has roused the collar men; a number took notes, it is supposed, with a view of answering him—of this we have some doubts. Mr. Polk has the floor, and probably will go fully into the discussion. I think Mr. Binney will not enter into the debate in this stage of it—he will reserve his long thirty two pounder for a raking shot. It is generally admitted that the weight of talent and of argument, in relation to the question of the removal of the deposits, is with those opposed to that measure. My opinion is, that in the House there will not be a majority in favor of restoring them, unless the embarrassments of the community should continue, and public opinion, out of doors, should operate upon the kitchen cabinet.

"We have a report here of the failure of a house in New York, for about one million—others are looked for."

Pennsylvania Prospects.—Pennsylvania, moved by the most laudable and praiseworthy motives, has, for many years, and sometimes amidst great difficulties, persevered in what may be emphatically called her system of internal improvements. She has honored herself, in her own eyes, and won the applause of her sister states, at the same time that she has enriched her citizens. Other states, seeing the good effects of the Pennsylvania system, have followed it, until even the South is in motion, to accomplish the same great ends, and similar benefits to her citizens.

Pennsylvania, however great the works that have been accomplished, may be said to have only demonstrated, in the fruits of the past, the multiplied benefits which await the future. But at this point our hopes are arrested! We feel a shiver, at sight of that hand, whence flowed the money to carry on, and perfect this great system, *shut!*—Yes, *shut!* We grieve to think that, at this moment, and under the present condition of things, the means *cannot* be obtained, even on *the faith of the state*, to consummate the most magnificent system of internal improvement, and one promising, when completed, the most enriching results, that ever conferred fame on a state, or benefits on its citizens.

Hitherto, in our remarks on the derangement of the currency, we have contemplated its effects on individual interests. Men *feel* that our predictions and statements are verified, and all honest and humane men unite in deploring the evil which afflicts the citizen. The State, in her capacity as such, is destined, unless a remedy is applied, to *feel* also. Yes, the State, the noble, fertile, and rich State of Pennsylvania, is destined to see her plans of internal improvement broken up, her workmen dropping from their hands the pick, the shovel, and the spade; the saw, the trowel, and the hammer; and turning from their labors, wandering over the land, in quest of something on which to subsist!—*Philadelphia Herald.*

The Deposits.—The public has been officially assured that the transfer of the Deposits would produce no embarrassment to commercial operations—that the curtailments of discounts by the U. S. Bank would be supplied by the extended accommodations of the deposit Banks—and that the notes of the latter would be received by each in payment of bonds to Government. That the assurance has failed on the first and second points, is obvious, from the great pressure for money existing in the commercial cities. On the third point, we have positive evidence of the refusal of the deposit Bank in this city, to receive the notes of othe. deposit Banks, in payment of Government bonds. We know that it is with difficulty that merchants can get the Union Bank to receive the notes of the Bank of Virginia in discharge of bonds—and that said Bank has positively rejected those of the Deposit Banks in South Carolina, and elsewhere. This is embarrassing to merchants, because they had been induced to believe that they were to have the same facility of paying their bonds, as when the U. S. Bank had the deposits. If the Deposit Banks are not to be required to receive the notes of each other in payment of bonds, the fact should be immediately made known, and the assurance to the contrary be publicly withdrawn.—*Balt. Chron.*

The following extract is from a published letter, written by Mr. Kendall, to the editor of the N. Y. Standard, and dated, 9th October last. Its language shows the ferocious rancor of the Kitchen Cabinet against the Bank, and its assertions form a curious contrast with the actual state of things. —*Nat. Gaz.*

"When you consider that the public moneys in the Bank were about $9,868,000; that their sudden withdrawal would carry with it probably $3,000,000 out of the private deposits now amounting to about $8,000,000; that the Bank has now to pay two or three millions of the three per cents. deferred in Europe; and that upon so extensive a curtailment of business, many millions of its nineteen millions in circulation must soon return upon it; you will perceive that the sudden withdrawal of the public moneys would at once destroy it. Yes, sir, this boasting giant is now but a reptile beneath the feet of the Secretary of the Treasury, which he can crush at will. It exists by his forbearance, and will for the next forty days; and great forbearance will it require to save it from destruction."

"But do not suppose the Bank will be permitted to pursue a hostile course towards the State institutions, and thereby produce that pressure which it is the policy of the administration to prevent.—Manifestations of such a course on the part of the Bank will undoubtedly be met by a commensurate transfer of the public money, which shall make the Bank the first to feel the consequences of its own policy."

"Thus has this haughty institution been brought to its knees at the first step of the State Banks.—But the result of a *necessity* forced upon it by the foresight and energy of the new Secretary of the Treasury, is now, with characteristic impudence, set down to the account of *its own liberality and forbearance.*"

Extract of another letter of Mr. Kendall, published in the Standard—date, 18th Oct.

"In your city, the whole amount of revenue receivable for three months to come, will be available to the State Banks receiving it for the accommodation of the public, inasmuch as no treasury warrant will be drawn upon them so long as the Treasurer has any money in the United States Bank. I understand the three Banks have extended their discounts two millions of dollars, and the other Banks in your city, probably, two more. This is enough, in all conscience, and I think a little too much for the time. It is not desirable they should go further; for a greater line of discount cannot, at present, be sustained. It is this which still makes the branch a creditor Bank, and the more their discounts are extended, the greater will this evil be. But if the State Banks will go no further, there will soon be a change in the relative position of the Bank. The receipts of the distant branch paper by the Bank, as well as her own, must, if your Banks are prudently managed, throw the balances on the other side. These balances will be collected in coin, and in that way it will be transferred.—You mention that the Merchants' Bank drew $60,000 from the branch; this will be followed by other drafts until the United States Bank will find it difficult to sustain the branch in your city. As things now are, that institution must keep the means there to meet almost its entire circulation, and it will have to become a great collector of specie from every quarter of the Union, for the ultimate use of your Bank, and others who may want it at New York."

From the Charleston Southern Patriot—an impartial paper, edited by a political economist.

"With regard to the Banking concerns of the country, they were never in a less satisfactory state. We are of opinion, that, unless Congress acts with promptitude and energy, in this matter, that great evils, which now impend over the country, will be rapidly realized. This subject, after all, lies at the root of the general prosperity, and the winding up of the affairs of the Bank of the United States will assuredly precipitate us into all the inconveniencies of a vitiated currency, deranged exchanges, and a fluctuating value of property, unless the danger is met in time.

"We, of course, differ with the President in his views on this subject. We are not the apologists of the Bank, in the whole course of its administration. Yet, we think, whatever be its errors, they are not of such magnitude but that a regard to the general good requires a renewal of its char ter. In the balance of political good and evil, stability and certainty are important make weights. An established monetary system should not be disturbed, unless from reasons of the most urgent necessity. Now, even admitting that there has been interference in the elections of the country, by the Bank, and that this is of evil influence, has this interference been so general as to warrant the dislocation and derangement of our entire system of currency? We should answer, assuredly not."

National Convention.—The Philadelphia Intelligencer (a Jackson paper,) says, it is still opposed to a National Convention for the nomination of a candidate for the next Presidency.—Among the reasons assigned for this opposition, are the following, which certainly appear to possess weight, and therefore deserve consideration, before the measure of a National Convention is adopted by the "Great Republican Party:"—The Intelligencer is opposed to such a Convention—

Because it would not represent the people.—The National Convention would not comprize a single poor man. It would cost to attend the convention from Pennsylvania, a hundred dollars; from Maine, two hundred; from Louisiana, four hundred; and from Alabama, still more. Who is to bear this expense?—The delegate. Who then will attend it, the poor man? No, he cannot afford it. It will be crowded with the affluent, the aristocratic.

Because it will be a convention of the office holders.—The people go to the polls, and vote fairly; but the industrious mechanic and farmer often fail to attend town meetings. Yet, at these meetings, and not at the polls, the President is, by this new plan, to be elected. Who then will elect him? The office holders, the politicians, interested, and corrupt men. There are in the pay of the Government,

343 Custom house officers;
42 Land officers;
8,400 Post officers;
134 Receivers of internal revenue;
37 Marshals;
23 Clerks of Courts.

These, with those not mentioned, will make a corps of upwards of 10,000 men, almost without exception, active and leading politicians, with no interest in common with the people, all anxious for their offices, and all grasping for power. These 10,000 men, thus united, spread over the country, and making the arrangement of this Convention a part of their daily labors, will pack it with their own instruments, and make it wholly subservient to their own corrupt designs.

What is the consequence? The people are stripped of all power. The office holders will run riot in their conscious strength, rob the people with impunity, and defy all their endeavors for redress. The ballot boxes will become a mockery; and the people, degraded and powerless, will groan under a despotism worse than that of Turkey. Such are the fruits of a National Convention. Why then should we establish it?

Cumberland Bar.—The obstruction in the navigation of the Ohio, occasioned by this formidable bar, has been completely obviated. A dam, five eighths of a mile in length, fifty feet broad at its base, eight feet wide at the top, and rising four feet above low water, has been erected, between Dog Island, near the Illinois shore, and the head of Cumberland Island. This dam is so secured by abutments that it cannot be undermined by the action of the current; and, by it, all the water that flows down the river, at a low stage, is thrown between Cumberland Island and the Kentucky shore. No doubt is entertained of the permanency of this very extensive dam, by which the bars, at the head and foot of the Island, have already been so far removed as to give, at that place, as great a depth of water as there is over the ordinary bars of the river; and the action of the current is daily deepening the channel and sweeping away the remnants of the bars. The citizens of Smithland are delighted with the improvement, and it must prove highly acceptable and beneficial to those engaged in the navigation of the Ohio.—*Louisville Adv.*

The latest accounts from New Orleans, furnish a very unfavorable report in reference to the actual extent of the sugar crop of Louisiana, of the present season. The early frosts have proved so very injurious to the cane, that the Bulletin, of the 9th, states that, instead of producing 120,000 hogsheads, it will fall short of that quantity at least *fifty thousand* hogsheads. The loss to the planters, if the extent of the injury be not overrated, is set down at four millions of dollars. We hope, however, that the actual result will show these estimates of loss to be exaggerated. A corroboration of this unfavorable report is contained in the following extract of a letter which we find in the last Richmond Compiler.—*Balt. Amer.*

NEW ORLEANS, Dec. 6, 1833.

"I regret to say to you, that the sugar crop is materially injured, the evidence of which is to be seen on both sides of the Mississippi in descending. It is allowed on all hands, that it will not yield more than 75,000 hogsheads. There have been 400 shipped to Baltimore, 200 to Norfolk, and one cargo to Richmond.—New Orleans is crowded with strangers, and that man is lucky who finds a place to put his head into."

General Washington.—The Cabinet of Washington was one of extraordinary splendor, talent, and patriotism, and which, in the force of its character, its indefatigable industry, the unspotted purity of its motives, and the prophetic wisdom of its councils, has never been surpassed, or even equalled, by the cabinet of this, or perhaps of any European nation. This splendid pre-eminence will not appear strange, if we consider the peculiar influences under which it was warmed into life. Not in the silence of the lettered closet—not in the enjoyment of fastidious ease, but on the bloody field where nations battled for victory, for glory, for liberty—not under the protection of a wise and humane government—but when time had beaten the old confederacy into a pile of ruins, when the national treasury was a mere starveling, and the laws but hives of folly, weakness, and despair—it was in the darkest hour of this dark period, that Washington, looking into the very secrets of the future, summoned around him the chivalrous Hamilton, the philosophic Jefferson, the bold and sagacious Knox. Chaos immediately assumed the form of beauty. Happiness grew to the perfection of its nature. Commerce lifted up its drooping head, and spread its snowy wings over the boundless ocean. Prosperity looked down on all America. Wise men were her legislators, brave men her defenders, and happy, indeed thrice happy, were her citizens. When shall we have such times again? When another Washington shall exist.—*Poulson.*

Late Mississipi papers have furnished us with copies of the annual message of the acting governor, Lynch, and of the inaugural address of Governor Runnels on his installation into office. Both documents are very strong in their denunciation of the doctrines of Nullification, and equally earnest in pressing upon the attention of the legislature the importanne of providing for public instruction, and developing the resources of the State by liberal schemes of internal improvement. Governor Lynch suggests the necessity of establishing primary schools, in every county in the State, and recommends the construction, without delay, of at least *three* Rail Roads, across the country, terminating on the navigable streams. The same plan as that adopted in North Carolina, finds favor in Mississippi. Wherever individual subscriptions have been made, and paid up, to the extent of two thirds of the capital stock of any chartered company, it is recommended that the State should always subscribe for the remaining third.—*Balt. Amer.*

There can hardly be a doubt that the subjoined paragraph, which has just reached us in the last number of the Albany Argus, is written by dictation or procurement of the Kitchen Cabinet. It has very visibly the ear mark of that concern. It is altogether in their spirit and temper; just as liberal, tolerant, and charitable. What must the editor of the Albany Argus think of the honor and integrity of the gentlemen whom the people of New York send to represent them here, when he *dares* to address them in this hectoring and domineering style? Does he take them for spaniels, that will crouch beneath the lash of their master, and even quail at his frown? Are they men, and will they submit to insolent dictation like this?—*Nat. Intel.*

"THE PEOPLE WILL MARK THE ADHERENTS OF THE BANK, OPEN OR DISGUISED.—The great object of the Bank, in striving to retain the Government Deposits, and to effect their restoration, is the accumulation of power in the hands of the corporation, *by which it can compel a renewal of its charter!* By means of the Government millions, it had designed, (and it still designs, if it can recall them,) to exercise its power over the State Banks, and over the money market, in a manner so threatening and ruinous to banks and the borrowers of money, as to compel an acquiescence in a recharter.

In the face of this startling fact, we are told by the Bank press that the question of renewal and the question of restoration are essentially different; and that members of Congress may vote for the one who are *honestly* opposed to the other. The People will scout any such refinements upon the common sense and upon the plainest facts of the case. *Every member of Congress who votes for the restoration of the deposits to the Bank of the United States, is at heart the friend of the Bank and the opponent of the President;* and if he does not vote directly for the recharter, will only be restrained from doing so by the certain reprobation of the People. So the People of this country will understand this matter. Any indirect aid to the Bank, by a vote *for the Bank* on the question of the deposits, will be regarded by them as an exhibition of devotion to the Monopoly, without the manliness or courage to avow it."

From the National Intelligencer.

We respectfully request of some one of the many respectable gentlemen who have friendly intercourse with the President of the United States, to communicate to him the information contained in the subjoined extract from a Western paper, that he may immediately cause to be dismissed from the public employ, the persons named therein, who thus bring the patronage of the Government in conflict with the freedom of election:

From the Western Reserve Chron. of Dec. 19.

"*The rats that ate the malt that lay in the house that Jack built.*"—The Hon. Robert Price, *Postmaster* at Milton, Cornelius Tomson, Esq. *Postmaster* at Austintown, Andrew Burgess, Esq. *Postmaster* at Poland, David Tod, Esq. *Postmaster* in this village, and *one* other gentleman who does not happen to hold a postmaster's commission, have issued orders, in the News Letter, for a meeting of the "democrats" of Trumbull county, to be held at the Court House, on the 25th instant. This meeting is to appoint some eight or ten delegates to attend a State Convention, which has been ordered by some of the larger fry of office holders, to be held at Columbus on the "glorious eighth," the object of which, among other things of minor importance, is to appoint delegates to a National Convention, where Martin Van Buren is to be put in nomination for the Presidency.

Such is the course now pursuing in almost every section of the Union. *The office holders*, either openly or covertly, are getting up meetings of "the party," which they take care to manage in such a manner as to insure the appointment of such delegates to the National Convention, and such only, as are in favor of Van Buren. These meetings they style "primary meetings;" and his nomination, when effected, will be trumpeted forth as emanating directly from the people; when, in fact, the large mass of them will have had as little to do with it as have John Doe and Richard Roe in our courts of justice."

☞ A meeting of Banks was held yesterday.—We understand the following Banks have agreed to memorialise Congress to ordain that the duties hereafter accruing may be deposited in the Bank of the United States, viz:—Bank of North American; Pennsylvania; Commercial Bank of Pennsylvania; Mechanics' Bank; Penn Township Bank; Kensington Bank; Southwark Bank; Manufacturers and Mechanics', and probably the Germantown Bank.

The following Banks, it is reported, will decide to day, viz: Bank of the Northern Liberties; Farmers' and Mechanics', and Schuylkill. The Philadelphia and Western Banks have declined.—*Phila. Herald, Dec.* 24.

From the N. Y. Evening Star.

The publication of the letters from Amos Kendall, addressed, as is supposed, to Beers & Co., has produced a sensation among the decided and thorough going friends of the President, as they conclusively shew the connection between Mr. Kendall and certain stock jobbers in Wall street, who have been known to sell heavy amounts of stock in the United States' Bank, deliverable at a future period.

The light begins to break in upon certain persons who hitherto have approved of all that has been done in relation to the deposits. This late correspondence between the Fourth Auditor and Wall street Brokers, conclusively shews that it was not the safety of the Bank, or the power of the Bank, its constitutionality, or its political character, that weighed so heavy on the minds of the Kitchen Cabinet, which have led to all this trouble and public distress. It was *base speculation in the stocks* which induced them to assail that institution—to endeavor, by the whole force of party—by the support of the servile press—to break it down, that they might sell stock ahead, and realize a profit by hastening on the distress of the merchant.

From the same.—We understand that orders have been received by two of the Deposit Banks from the Treasury, to be in readiness to meet certain drafts for the expenses of government. This order, which might have been anticipated, has thrown them into a dilemma, having already largely discounted on the deposits; and to meet these drafts, great curtailments of discounts must be made, and new troubles created.

We publish, to day, as we have learned it, the result of the deliberations of the Banks of the City and County of Philadelphia, on the all absorbing subject of the Deposits.

The Banks that have adopted the memorial, and besought Congress to restore the financial system to its recent condition, merit, and will receive the gratitude of an oppressed and suffering people.—We look confidently to the co-operation of two other Banks, to day, who hold the subject under advisement. It was hardly to be expected that the Girard Bank would take an active part in this subject—but there is too much intelligence in the Bank, and too strong a desire to see the people relieved, not to *desire* it. It is too plain, even to the most common observer, that, unless the change shall take place, both Banks and people must pay the cost. It seems, to our view, to be suicidal, in the Banks, to remain as they are, and they that refuse to co-operate give not the sort of proof that common sense people look for—of their regard to the interests of the people.—*Philadelphia Herald, December* 24.

CONGRESS.

The Senate yesterday adjourned over to Thursday, and the House of Representatives to Friday. The House was desirous of adjourning over to Monday, and sent a joint resolution for that purpose to the Senate; but the Senate refused to concur in it. The House having, however, adjourned to Friday, and that day and Saturday, in each week, being set apart, by the rule, for the consideration of bills and reports of a private nature, (such as claims, pensions, &c.,) it is not probable that the debate, on the question concerning the removal of the Government Deposits, will be resumed before Monday, when Mr. Polk, (the chairman of the committee of ways and means,) is expected to speak, he having obtained the floor when Mr. McDuffie concluded his speech on Monday.—*Nat. Intel. Dec.* 25.

Mademoiselle Bertin, the milliner of Maria Antoinette, when ordered to bring her books of credit before the National Assembly, as an evidence of the prodigality of her Royal customer, burned them, and thereby destroyed documents against her debtor to the amount of 20,000 francs.—*Poulson.*

NUTRITIVE MATTER.—The following is taken from Sir H. Davy's Table of Nutritive Matter afforded by different vegetables.—*Genesee Farmer.*

1,000 parts each gave the following:—

Winter Wheat,	955	Rye,	792
Spring Wheat,	940	Barley meal,	920
Indian Corn,	800	Oat meal,	670
Potatoes,	250	Turnips,	42

Now if we make a table from the above calculations, giving to each the produce of an acre (as near as may be) we shall see at once the relative value of each compared, with the other, as contributing to the support of animal life:

			Nutritive Matter.
Potatoes,	12,500 lbs.	would give	3,125 lbs.
Indian corn,	2,400 "	"	1,020
W. Wheat,	1,200 "	"	1,146
Rye,	900 "	"	722
Barley,	1,200 "	"	943
Oats,	960 "	"	552
Turnips.	7,500 "	"	315

Thus it appears, that one acre of potatoes is equal to about two acres of Indian Corn, three of Wheat, four of Rye, or Barley, six of Oats, or ten of Turnips.

It appears that Prussia and Germany, at the instigation of Russia, are about to impose so heavy an impost on British manufactures as to amount to a prohibition. Much anxiety has thereby been excited among the English merchants, least Nicholas may prove another Napoleon.—*Poulson.*

India Rubber.—There is a manufactory of India Rubber, leather, cloth, &c. in Roxbury, Massachusetts which employs about one hundred persons. Some years since, an American chemist discovered a method of dissolving India Rubber and reducing it to a paste, which, being spread with a brush over the surface of cloth, and dried, rendered the cloth water proof. He obtained a patent, and sold it to the Roxbury Company, and is now in their employment. They manufacture beds and pillows without sewing, which a man may almost carry in the crown of his hat, and at night blow them up to any size and sleep on them. They make gas pipes, engine hose, garments of every description without atitches or seams, &c. These garments protect the person from rain and storm as completely as if made of iron. They also make many garments of cloth, and then cover them with a coat of india rubber. This coating can be applied from thenness of paper to any required thickness. About 40 girls are employed in sewing the garments and applying the rubber. The cloth made entirely of rubber is said never to crack and of its durability there seems to be no end.—The Company cannot half supply the demand, and their shares, which cost 100 dollars each, are now considered worth from 300 to 400 dollars.—*Poulson.*

Destruction of Human Life by Cholera.—The disease called spasmodic Cholera appears to have been unknown previous to 1817, when it appeared in India. Since that time till near the end of 1832, a period of about fifteen years, there has been throughout the world, as nearly as can be estimated, one hundred millions cases. Of these, fully one half, at least, must have died—which gives a mortality from this single disease, of 50,000,000 in the above period, or upwards of 3,333,000 annually. In India alone the mortality exceeded 18,000,000. These calculations have been made by Jonnes, the celebrated French physican, and it is estimated they are rated under, rather than above, the truth. —*Poulson.*

FAIRBANK'S PLATFORM SCALES.

THESE scales are constructed upon an improved principle; are fitted up with great care by the manufacturers, and warranted to weigh with accuracy from half a pound to 12,000. Being placed in, and forming part of, the floor, the process of weighing is performed with ease and facility, while the space they occupy may be improved as a passage way or for other purposes.

The construction of these scales is such that they are little liable to derangement of wear, and their perfect operation will be guaranteed for any reasonable length of time.

The usual objection, that a new method of weighing cannot be safely entrusted to unskilful hands, is obviated by the use of the improved BALANCE, concerning which are the following remarks in the Journal of the Franklin Institute, of the state of Pennsylvania, for the promotion of the Mechanic Arts, for June, 1833. (Edited by Thos. P. Jones, M. D., late Superintendent of the Patent Office, at Washington, Professor of Mechanics in the Franklin Institute, &c.

"The Messrs. Fairbanks, some time since, obtained a patent for a Platform Weighing Machine, and this mode of adjuating and graduating the Beam of the Balance, and the weights, was devised by them with a view to its employment with the before mentioned machine. We have had an opportunity of examining one of their balances, and have been much pleased with it: this examination, however, was not necessary to the conviction that it possesses a just claim to the character of a real improvement, the whole arrangement being so simple as to enable any person to perceive that it is well adapted to the purpose contemplated, that of facilitating the business of weighing, and more especially of heavy articles."

The subscriber, as Agent, will receive orders for the above Scales, which will be made in this city to order. They can be seen at his Warehouse, No. 84, Front street.

Nov. 8, 1833. MOSES ATWOOD.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1	tract of land	containing	330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40
other lots, containing about			6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county—and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others—a soil rich and productive—the neighborhood abounding in coal—well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

It will be sold in a body, or in parcels, to suit purchasers.

Terms of sale will be reasonable.

Information can be had by enquiring of the subscribers, two of whom live in the neighborhood, and one on the premises.

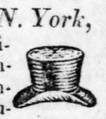
WILSON & SMITH, from N. York,



RESPECTFULLY inform the citizens of Pittsburgh and the neighboring towns, that they have commenced the manufacture of the above beautiful and elegant article, so much admired and worn throughout Europe, and the principal cities in the United States.

W. & S. beg leave to observe, that, after various experiments, they have at last succeeded in bringing this Hat to the highest state of perfection, and they can assert, with confidence, that in point of color, lightness, elasticity, durability, and general beauty of appearance, they cannot be surpassed by the most expensive Hat that is made. Gentlemen are invited to call and examine them, and judge for themselves.

Wholesale Dealers supplied at the same prices as in the New York markets.

DOCTOR ROBERT'S
☞*WELCH MEDICAMENTUM.*☜

FOR the cure of Dyspepsia, Liver Complaints Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

UTICA, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer s vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

GEO. W. CARPENTER'S
COMPOUND SYRUP OF LIVERWORT,

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradually increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

TYPE FOUNDRY.

HAVING purchased of Mr. Richard Ronaldson, his long established and very extensive Type Foundry, the subscribers have formed a co-partnership for the purpose of continuing said business, and for the convenience of their friends and patrons, have removed their establishment to a more central part of the city. As it is their intention to keep on hand a good assortment of the best type, and to make such additions and improvements as the taste of the trade and the wants of the country require, they flatter themselves that this establishment will merit a large share of patronage. They have now several founts on hand, which can be furnished at a few hours' notice, and are prepared to make founts of all weights and sizes, from Pearl to 22 lines Pica, including a variety of Ornamental Letter. Their assortment of Cuts, Dashes, Brass Rule, and other Ornaments, will be found to be very extensive, of which specimens will be forwarded to Printers as soon as they can be prepared.

Printing Presses of every description, Printing Ink of the most approved qualities, Composing Sticks, Brass and Common Galleys, Chases, Imposing Stones, Cases, Paper and Press Boards, Standing Presses, Furniture, together with a complete assortment of all articles used in a Printing Office, will be kept constantly on hand.

Small founts, suitable for Book Binders, in great variety, may be had when called for.

Orders from all parts in the Union will be promptly and most carefully attended to, and particularly in supplying *sorts* for all founts furnished by their predecessors, Binny & Ronaldson, and Richard Ronaldson.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Heron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.
